ILLU CABLE

The string lights with E27 sockets are intended as decorative Lighting. The manufacturer or the seller cannot be made liable for injury or damage resulting from improper use of the string lights. You can use bulbs with E27 sockets up to a combined total not exceeding 2000 watts of power. When extending the cable, make sure that the power consumption of the sum of all connected lines and sockets does not exceed 2000 watts. The individual socket has a maximum power consumption of 100 watts. It is recommended to use efficient LED bulbs. Make sure that the supplied sealing rings are not damaged and form a protective seal between the socket and the bulb so that no moisture can enter the socket.
